Amendments of the Claims

The following listing of claims replaces all prior listings and versions of claims in this application.

<u>Listing of Claims</u>:

1.   (canceled)

2.   (currently amended) The method of claim [[1]] <u>5</u> wherein storing the title further comprises storing data indicative of a location on the video recording media at which the television program is recorded.

3.   (currently amended) The method of claim [[1]] <u>5</u> wherein the storing of the title in the directory of programs recorded on the video recording media comprises storing the title in a memory separate from the video recording media.

4.   (currently amended) The method of claim [[1]] <u>5</u> wherein the storing of the title in the directory of programs recorded on the video recording media comprises storing the title on the video recording media separate from the television program.

5.   (currently amended) [[The]] <u>A</u> method ~~of claim 1 further~~ <u>for recording and indexing television programs on video recording media</u> comprising:
<u>storing a plurality of television program listings in memory, each television program listing including data</u>

indicative of the title, channel and start time for at least one
television program;

     displaying on a display monitor at least some of the
plurality of program listings stored in the memory;

     selecting one of the displayed program listings for
recording;

     recording on the video recording media a television
program corresponding to the selected one of the displayed
program listings; and

     storing the title from the memory corresponding to the
recorded television program in a directory of programs recorded
on the video recording media.

     6.   (original) The method of claim 5 wherein
selecting comprised providing a movable cursor on the display
monitor and moving the cursor on the monitor to select one of
the displayed program listings.

     7.   (currently amended) The method of claim [[1]] 5,
in which storing a plurality of television program listings
comprising storing the plurality of television program listings
in one section of memory.

     8.   (original) The method of claim 7, in which the
directory is stored in a second section of memory.

     9.   (canceled)

10. (currently amended) The system of claim [[9]] 15 wherein the directory data store further receives data from the video recorder indicative of the location at which the television program was recorded.

11. (original) The system of claim 10 wherein the directory data store comprises the video recording media wherein the data indicative of the location at which the television program was recorded is stored separate from the television program recorded on the video recording media.

12. (currently amended) The system of claim [[9]] 15 wherein the directory data store comprises memory separate from the video recording media.

13. (currently amended) The system of claim [[9]] 15 wherein the directory data store comprises the listings memory.

14. (currently amended) The system of claim [[9]] 15, further comprising a single memory that comprises a first section comprising the listings memory and a second section comprising the directory data store.

15. (currently amended) [[The]] A system of claim 9 further for recording and indexing television programs on video recording media comprising:

a listings memory in which a plurality of television program listings is stored, each television program listing

4

including data indicative of the title, channel and start time
for at least one television program;

      a display generator that renders a display of at least
some of the plurality of program listings stored in the memory;
[[and]]

      an input for receiving the selection of at least one
of the displayed program listings for recording;

      a video recorder that records a television program
corresponding to one of the plurality of television program
listings onto video recording media; and

      a directory data store that receives the title from
the listings memory corresponding to the recorded television
program.

      16. (original) The system of claim 15 wherein the
display generator further renders a movable cursor on the
display monitor and the input further receives commands to move
the cursor on the display monitor to select at least one of the
displayed program listings.

      17. (canceled)

      18. (currently amended) The system of claim [[17]] 23
wherein the directory means further receives data from the video
recording means indicative of the location at which the
television program was recorded.

      19. (original) The system of claim 18 wherein the
directory means comprises the video recording media wherein the

data indicative of the location at which the television program
was recorded is stored separate from the television program
recorded on the video recording media.

20. (currently amended) The system of claim [[17]] <u>23</u>
wherein the directory means comprises memory separate from the
video recording media.

21. (currently amended) The system of claim [[17]] <u>23</u>
wherein the directory means comprises the listings memory.

22. (currently amended)The system of claim [[17]] <u>23</u>,
further comprising a single memory means that comprises a first
section comprising the listings means and a second section
comprising the directory means.

23. (currently amended) [[The]] system ~~of claim 17~~
~~further~~ <u>for recording and indexing television programs on video
recording media</u> comprising:
<u>listings means for storing a plurality of television
program listings, each television program listing including data
indicative of the title, channel and start time for at least one
television program;</u>
display means for generating a display of a<u>t least
some of the</u> plurality of program listings stored in <u>the</u> memory;
[[and]]
input means for receiving the selection of at least
one of the displayed program listings for recording<u>;</u>

6

<u>video recording means for recording a television program corresponding to one of the plurality of television program listings onto video recording media; and</u>

<u>directory means for storing the title from the listings means corresponding to the recorded television program</u>.

24. (original) The system of claim 23 wherein the display means further generates the display of a movable cursor on the display monitor and the input means further receives commands to move the cursor on the display monitor to select at least one of the displayed program listings.
